

P0550 antireflection audit - single-figure answer

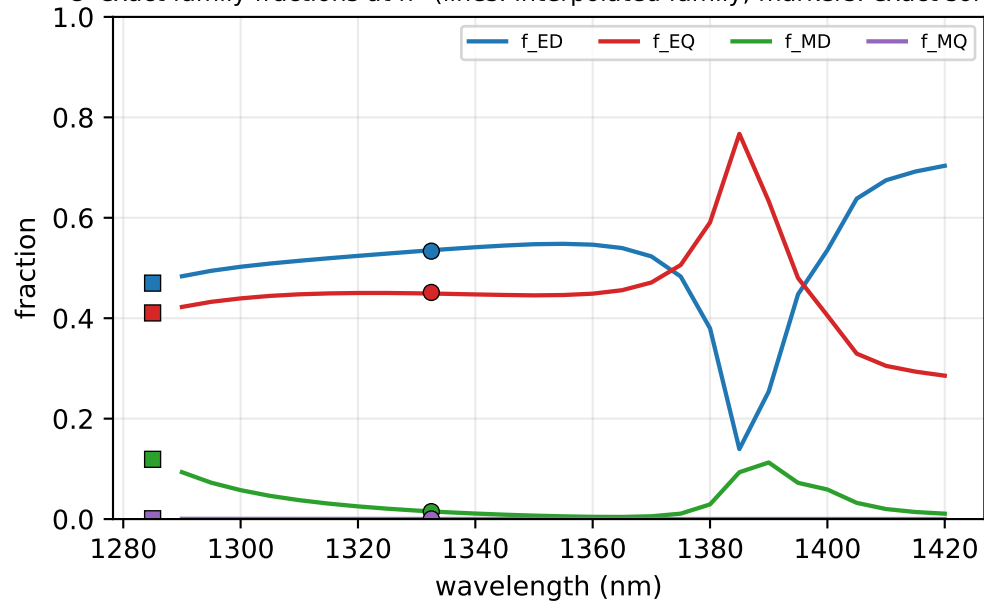

A P0550 hard-binary topology (a-Si dark, P = 550 nm, fill 0.62)

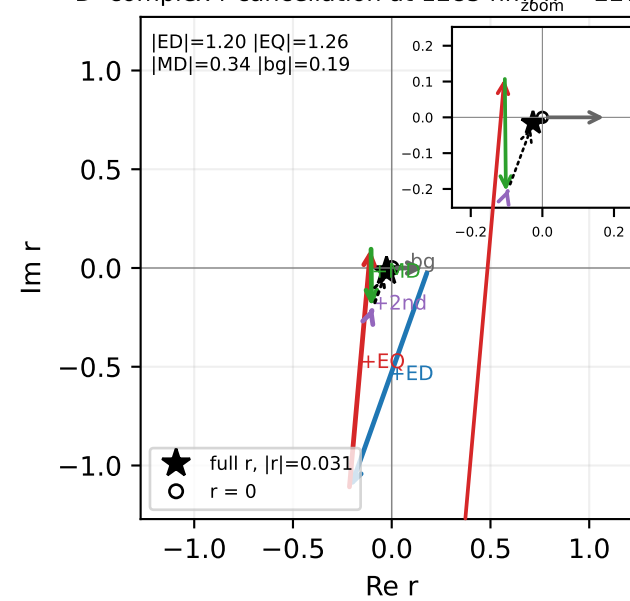

B is it antireflective? R vs all baselines

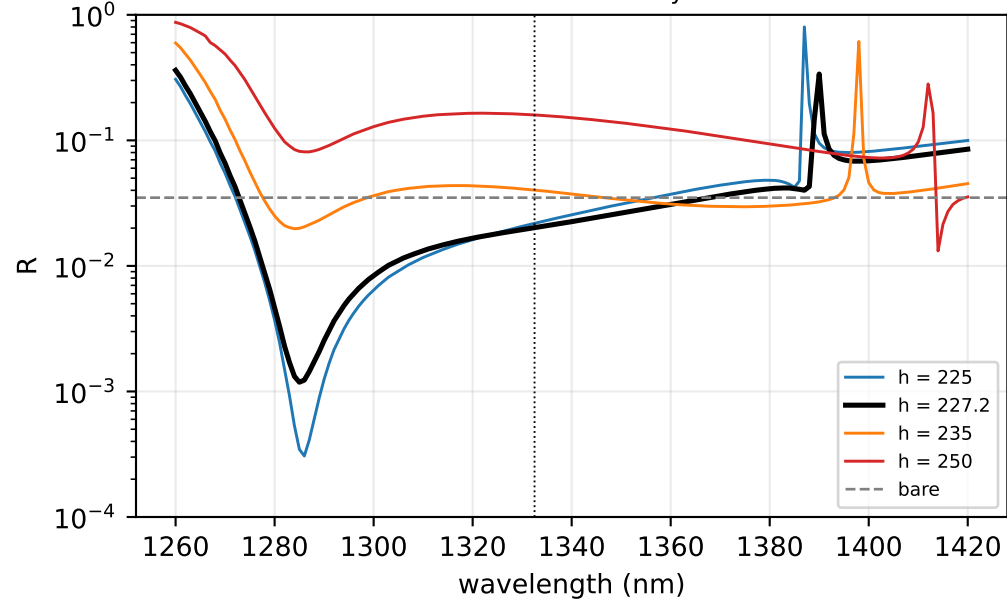

C exact family fractions at h^* (lines: interpolated family; markers: exact solves)

D complex-r cancellation at 1285 nm, $h = 227.2$ nm

E thickness family

F both illumination directions (h^*)
